STAFF COMMENTS

025-04/05-CA 658 Government Street
Applicant: McDonald’s Restaurants
Received: 2/14/05 Meeting Dates:
Submission Date + 45 Days: 3/31/05 1) 2/28/05

INTRODUCTION TO THE APPLICATION

Historic District: Church Street East Historic District
Classification: Non-Contributing
Zoning: B-4, General Business
Nature of Project: Demolish existing non-historic restaurant & re-construct new restaurant as per submitted plans.

The building site is located on the north side of Government Street between Washington and South Dearborn Streets.

The existing front of the restaurant is situated within 5’ of the sidewalk with mature landscaping between the building wall and the sidewalk. The existing building is the only structure on the north side of the street between Washington and South Dearborn Streets. The remainder of the block is taken up with parking for the restaurant.

The proposed building measures approximately 45’ wide by approximately 105’ long.

The building faces south towards Government Street, and the front building line is located at a distance of 37’ from the sidewalk. The proposed building is one story brick veneer over concrete block on a slab-on-grade foundation. The ground plan is rectangular in design. The overall wall height is 17’ to the top of the parapet, with areas at the corners, the entrance, and over the drive thru windows raised to 19’-8”.

The glazing system is anodized aluminum with clear insulated glass. A flat roof will be hidden behind the parapet wall.

The following are proposed building materials:
- foundation – concrete slab-on-grade
- façade – brick veneer over concrete block
- doors – clear glass in anodized frames
- windows – clear glass in bronze anodized frames
- awnings – green metal
- roof – flat concealed behind a parapet

STANDARD OF REVIEW

Section 9, STANDARD OF REVIEW, of the Historic Preservation Ordinance states that “In the case of a proposed new building, that such building will not, in itself, or by reason of its location on the site, materially impair the architectural or historical value of the buildings on adjacent sites or in the immediate vicinity and that such building will not be injurious to the general visual character of the Historic District in which it is to be located.”

STAFF REPORT

3, I

I. Placement and Orientation: The guidelines state that new construction should be placed on the lot so that setback and spacing approximate those of nearby historic buildings.
   A. Setbacks in the Church Street East Historic District range from buildings constructed at the sidewalk to buildings with a 5’-25’ setback.
   B. The proposed building site is located on the footprint of the existing building.
   C. The existing setback is 5’.
   D. The proposed setback is approximately 37’.
   E. The extra distance is to accommodate an internal circle of traffic flow.

3, II

II. Massing and Scale:

   A. The guidelines state that new construction should reference the massing of forms of nearby historic buildings.
      1. There are multiple examples of fast food restaurants in the Historic Districts.
      2. The proposed building is a 1 story brick veneer structure.

   B. The guidelines state that new buildings should have foundations similar in height to those of nearby historic buildings.
      1. There are no other historic buildings within this block.
      2. The existing restaurant has a slab-on-grade foundation.
      3. The Arby’s restaurant directly across the street has a slab-on-grade foundation.
      4. The proposed foundation is concrete slab-on-grade.

   C. The guidelines state that new construction should consider roof shapes, pitches and complexity similar to or compatible with those of adjacent historic buildings.
      1. A variety of commercial roof shapes exist in the Church Street East Historic District, but the most common are flat roofs behind a parapet.

3, III

III. Façade Elements:

   A. The guidelines state that new construction should reflect the use of façade elements of nearby historic buildings.
      1. The use of clear glass in bronze anodized frames is a common design element found in new construction throughout the Historic Districts.
      2. The use of a rusticated base with brick veneer and a header bands below the parapet add interest to the elevation.
IV. Materials and Ornamentation:
   A. The guidelines provide a list of appropriate materials for compatible new construction.
      1. There are a number of commercial brick veneer structures in the Church Street East
         Historic District.
   B. The guidelines state that the degree of ornamentation used in new construction should be
      compatible with the degree of ornamentation found in the design of nearby historic buildings.
      Profiles and dimensions should be consistent with examples in the district.
      1. The Board encourages use of modern materials and design methods in new construction.

V. Miscellaneous:
   A. The existing parking will remain unchanged.
   B. The existing brick and iron fence around the perimeter of the property will remain.
   C. The drive-thru area between the sidewalk and the building will be stamped concrete as per
      submitted photograph. This answers a recommendation of ARB staff by the applicant.
   D. There will only be one menu board per drive-thru lane.
   E. There will be a canopy over the menu board as per submitted photograph.
   F. Building signage includes four golden “M”s, each 16’ square for a total of 64 square feet of
      signage.

Staff recommends approval of the application with the following conditions:
   1. That the menu board poles be painted dark green to match the awnings.
   2. That the canopies over the menu boards be painted dark green to match the awnings.
   3. That the area between the sidewalk and the street be landscaped with liriope or other low-
      maintenance plant as opposed to colored aggregate.
   4. That there be a planting buffer between the proposed front drive and the city sidewalk.

STANDARD OF REVIEW

Section 9, STANDARD OF REVIEW, of the Historic Preservation Ordinance states that “the Board shall not approve any application proposing a Material Change in Appearance unless it finds that the proposed change “…will not materially impair the architectural or historic value of the building, the buildings on adjacent sites or in the immediate vicinity, or the general visual character of the historic district.”

STAFF REPORT

Based on the information contained in the application, and in Staff’s judgment:

A. The proposed construction is in compliance with Section 3 of the Design Review Guidelines.

1. The main complex is a series of historic and contemporary structures maintaining the look of separate structures but connected at the rear.
2. The proposed accessory structure designs are compatible with the main buildings.
3. The proposed accessory structure building materials are compatible with the main buildings.
4. The proposed building materials are as follows:
   - foundation – slab on grade
   - exterior walls:
     - attached shed - painted board & batten siding
     - freestanding shed – painted hardiplank lap siding
   - exterior doors – 1”x4” beaded edge on 1”x4” frame with false strap hinges
   - roofing – asphalt shingles over plywood decking

Staff recommends approval as submitted.

STANDARD OF REVIEW

Section 9, STANDARD OF REVIEW, of the Historic Preservation Ordinance states that “the Board shall not approve any application proposing a Material Change in Appearance unless it finds that the proposed change “…will not materially impair the architectural or historic value of the building, the buildings on adjacent sites or in the immediate vicinity, or the general visual character of the historic district.”

STAFF REPORT

Based on the information contained in the application, and in Staff’s judgment:

A. The proposed construction is in compliance with Section 3 of the Design Review Guidelines.
   1. The main structure is a one and one-half story wood frame bungalow with recessed three bay front porch, end gable roof and a large central front dormer.
   2. The proposed addition occurs across the rear of the residence.
   3. The proposed one story addition squares off the rear elevation, and measures 27’-8” deep by the existing width of the rear elevation.
   4. A 6’ deep recessed porch is supported by 3 12” square wood box columns matching the front porch columns.
   5. The Materials List and Design Details are appropriate for this structure.
      a. siding to match existing;
      b. brick piers with framed lattice infill to match existing;
      c. wood box columns;
      d. cornice, soffit, fascia, corner boards to match those of the main house;
   6. The addition will be approximately 5’ from the property line, following the existing line established by the main house.
   7. The Historic District Overlay Ordinance will compensate for this narrow setback.
   8. The proposed addition will not be visible from public view.

Staff recommends Approval as Submitted.

STANDARD OF REVIEW

Section 9, STANDARD OF REVIEW, of the Historic Preservation Ordinance states that “the Board shall not approve any application proposing a Material Change in Appearance unless it finds that the proposed change “…will not materially impair the architectural or historic value of the building, the buildings on adjacent sites or in the immediate vicinity, or the general visual character of the historic district.”

STAFF REPORT

Based on the information contained in the application, and in Staff’s judgment:

A. The proposed construction is in compliance with Section 3 of the Design Review Guidelines.

1. The main structure is a one story frame Victorian cottage.
2. The proposed wood fence is 6’ in height.
3. The fence will be unpainted, left to weather.
4. There are no setback issues as this is a lot in the middle of the block and the fence will be located on the east and south property lines.

Staff recommends approval as submitted.
